```

[Verse 1]

```

                E
We passed upon the stairs
                Am
We spoke of was and when
                E
Although I wasn't there
                C
He said I was his friend
                G
Which came as a surprise
                E
I spoke into his eyes
                Am
I thought you died alone
                G
A long, long time ago
    
```

[Chorus 1]

```

                C
Oh no, not me
                G#                C
I never lost control
                G                C
You're face to face
                G#                E
With the man who sold the world
    
```

refrängdelen:

Capo band 4
